VACUUM, ELECTRON AND ION TECHNOLOGIES
Papers from the Sixth Bulgarian Summer School
21–26 September 1989, Varna, Bulgaria

AUTHORS		ARTICLES
D S Karpuzov, I V Katardjiev and S S Todorov	**1**	Introduction
M Hautala and I Koponen	**3**	Dependence of collisional mixing on recoil energy
M Posselt	**9**	Range profile calculations by direct numerical solution of linearized Boltzmann transport equations
A F Burenkov and F F Komarov	**13**	Calculation of the depth profiles associated with high energy ion implantation
M Posselt and G Otto	**17**	Energy and angular distributions of ions backscattered from the sidewalls during the implantation into deep trenches
M J Nobes, G Carter and I V Katardjiev	**21**	The determination of species distribution and deduction of mixing and effective diffusion parameters in the altered layer of irradiated films
P Petrov and G Mladenov	**29**	Theoretical analysis of heat flow and structural changes during electron beam irradiation of steel
R Deltchev, M Albert, G Suchaneck and K Schade	**33**	Power dissipation in rf glow discharges
L Kostadinov and D Dobrev	**35**	A low working pressure magnetron sputtering source
K Steenbeck, E Steinbeiß, S Winkler, G Schmidt and G Bruchlos	**39**	Low voltage magnetron discharges for thin film preparation
D Czekaj, B Goranchev, E K Hollmann, V A Volpyas and A G Zaytsev	**43**	Incident ion energy spectrum and target sputtering rate in dc planar magnetron
T Heberlein, G Krautheim and W Wuttke	**47**	The sputter deposition process: a Monte-Carlo study
D N Popov and P I Docheva	**53**	Deposition of copper oxide, titanium oxide and indium tin oxide films by reactive magnetron sputtering
B N Smirnov	**57**	Low temperature gas plasma formation of thin films on the surface of a substrate via holes
M A Herman	**61**	Atomic layer epitaxy—12 years later
F Fujimoto	**67**	Boron nitride film formation by means of dynamic mixing method
V Yu Fominskii, A M Markeev and V N Nevolin	**73**	Pulsed ion beams for modification of metal surface properties
B X Liu	**75**	Study of alloy phase formation using ion beams
Yu E Kreindel and V V Ovchinnikov	**81**	Structural transformations and long-range effects in alloys caused by gas ion bombardment
A L Chekanov, I G Romanov and V N Perevezentsev	**85**	Effect of low-energy ion flows on the physico-mechanical properties and morphology of iron surfaces
K Gamo	**89**	Focused ion beam technology
N Drandarov, B Nikolov and Tsv Valchovska	**95**	Structure and emission characteristics of AuSi alloy field ion source
F F Komarov	**101**	Self-annealing in ion-implanted Si and GaAs

Vl Stavrov, R Varbanov, O Vasiliev and D Berova	**107**	Investigation of arsenic-implanted silicon by optical reflectometry
R V Gribkovskii, F F Komarov and A P Novikov	**111**	Buried Si_3N_4 layers in silicon produced by high-intensity implantation and rapid thermal annealing
S Müller-Pfeiffer and H-J Anklam	**113**	Computer simulation of hillock growth
E I Tochitsky, E I Obukhov, A I Sharendo, V V Boksha and K N Kasparov	**117**	Dry patterning through masks of organic materials
Yu B Gorbatov, V I Zinenko and A F Vyatkin	**121**	Fast atom and beam etching assisted by a fluorine-containing radical flow
B Spangenberg, K Popova, E Spasova, I V Katardjiev, G Carter and M J Nobes	**125**	Maskless etching of ion modified chromium films
M K Abachev, Yu P Baryshev, V F Lukichev, A A Orlikovsky and K A Valiev	**129**	Aperture effect in plasma etching of deep silicon trenches
R Kh Makhmutov, S N Sidoruk, K A Valiev, L V Velikov and V S Yakunin	**133**	Shadow electron beam 1 : 1 scale printing with 0.1 μm size elements
S P Chenakin	**139**	A comprehensive SIMS study of high-T_c superconductors
A A Kosyachkov	**143**	Angular and energy dependencies of secondary ion emission from polycrystalline and single-crystal surfaces
L Frank	**147**	Problems of scanning Auger electron microscopy
J L Vignes, J P Langeron, G.I Grigorov, I N Martev and M V Stoyanova	**151**	Quantitative Auger electron spectroscopic analysis of titanium nitrides
G S Spassov	**155**	Auger electron spectroscopic analysis of $In_xGa_{1-x}As$
I F Isakov, V N Kolodii, M S Opekunov, V M Matvienko, S A Pechenkin, G E Remnev and Yu P Usov	**159**	Sources of high power ion beams for technological applications
T D Radjabov	**163**	Modification of physico-mechanical properties of metals and metallic coatings by ion implantation

EXTENDED ABSTRACTS

U Littmark	**169**	Theoretical concepts of ion implantation, recoil implantation and ion beam mixing
K Reichelt and X Jiang	**171**	The preparation of thin films by physical vapour depositions
L Ilyinsky and A Lavrentyev	**173**	Temperature dependence of secondary ion emission for yttrium iron garnet
AUTHOR INDEX	**175**	
NEW PATENTS	**177**	

number 3

AUTHORS		ARTICLES
H J Halama and C L Foerster	**185**	Comparison of photodesorption yields from aluminum, stainless and Cu-plated beam tubes
F Shoji, K Oura and T Hanawa	**189**	A high energy ion scattering/channeling and low energy ion scattering apparatus for surface analysis
G Carter and D K Daukeev	**195**	The application of interactive controlled tempering for deduction of energy variable or distributed desorption processes

Tu Jiyuan, Zhu Yu and Wang Xianzhang	**199**	A new pumping disk for use in a turbomolecular pump with various length blades
H T El-Shair, M M El-Nahass and S S Fouad	**201**	Electrical properties of thin $Ge_x Se_{1-x}$ amorphous films
L Shivalingappa, M P Srinivasan and S Mohan	**203**	Highly stable oscillator for quartz crystal thickness monitor
J S Brinen and S Greenhouse	**205**	Applications of a gallium liquid metal ion gun in surface analysis
VACUUM NEWS	**219**	
BOOK REVIEW	**239**	
NEW PATENTS	**241**	
SOFTWARE SURVEY SECTION	**i**	

number 4

AUTHORS		ARTICLES
R K Fitch	**251**	Editorial
S Kato, K Josek and E Taglauer	**253**	Adsorption study of CO and H_2O on carbon materials, Ni and stainless steel
H Morkoç	**257**	New approaches in heteroepitaxy and related devices
A Kohlhase, M-L Cheng, S Kobayashi, J Murota and N Mikoshiba	**269**	Selective CVD of germanium on silicon and its applications
J Kessler, B Tomcik, J Waldorf and H Oechsner	**273**	Plasma beam deposition of diamond-like films
S Baba, A Kinbara and M Adachi	**279**	Island structure of sputter-deposited Ag thin films
L Smardz, U Köbler and W Zinn	**283**	Temperature and thickness dependence of unidirectional magnetic anisotropy effects in Co/CoO thin films
S Uthanna, B Schröder and H Oechsner	**287**	Preparation and characterization of boron doped a-SiC:H films by dc-magnetron sputtering technique
C Mößner and H Oechsner	**291**	Compositional and structural studies of ion beam deposited high-T_c oxide films by SNMS and REM
C U S Larsson and A S Flodström	**297**	Dissociative H_2O adsorption on the Si(100) 2×1 and Ge(100)2×1 surfaces
M R McCartney, P A Crozier, J K Weiss and D J Smith	**301**	Electron-beam-induced reactions at transition-metal oxide surfaces
B J Hinch, C Koziol, J P Toennies and G Zhang	**309**	Single and double layer growth mechanisms induced by quantum size effects in Pb films deposited on Cu(111)
Yidong Shao and J Paul	**313**	Water adsorption on Ge(100): a computational study
LETTER TO THE EDITOR		
M Katayama, B V King, E Nomura and M Aono	**321**	Structural analysis of the CaF_2/Si(111) interface by coaxial impact–collision ion scattering spectroscopy (CAICISS)
SOFTWARE SURVEY SECTION	**i**

FIRST SIMOX WORKSHOP
Papers from the SWI-88 Meeting
7–8 November 1988, University of Surrey, UK

AUTHORS		ARTICLES
J A Kilner, K J Reeson and P L F Hemment	**327**	Preface
	329	SIMOX Workshop—SWI-88
	331	List of participants
K Izumi	**333**	Historical overview of SIMOX
C Jaussaud, J Stoemenos, J Margail, A M Papon and M Bruel	**341**	Defects in SIMOX structures: causes and solutions
S J Krause, C O Jung, T S Ravi and D E Burke	**349**	Mechanisms of defect formation and growth during thermal ramping and annealing in oxygen implanted silicon-on-insulator material
S Visitserngtrakul, S J Krause, B F Cordts and P Roitman	**353**	Effect of dose and annealing conditions on the structure of silicon-on-insulator material implanted with oxygen at high temperature and at high current density
J Vanhellemont, H E Maes and A De Veirman	**359**	Spectroscopic ellipsometry studies of SIMOX structures and correlation with cross-section TEM
A De Veirman, J Van Landuyt, J Vanhellemont, H E Maes and K Yallup	**367**	Defects in high-dose oxygen implanted silicon: a TEM study
S Cristoloveanu	**371**	Oxygen-related activity and other specific electrical properties of SIMOX
R C Newman	**379**	Oxygen in silicon: thermal donors, intrinsic defects and contamination
C E Daniel Chen	**383**	SIMOX devices and circuits
J Belz, G Burbach, H Vogt and G Zimmer	**387**	High-quality SOI-substrates for CMOS transistors
C J Griffin and J A Kilner	**389**	The evolution of SIMOX dislocations
EXTENDED ABSTRACT		
J A Kilner	**391**	Models of buried layer formation
P L F Hemment, K J Reeson, J A Kilner and S J Krause	**393**	SIMOX bibliography
AUTHOR INDEX	**455**	

number 7

AUTHORS		ARTICLES
J W Lee and Y K Lee	**457**	Thermal analysis of cryopump first stage array

H T El-Shair and S S Fouad	**463**	Optical properties of thin Ge_x Se_{1-x} amorphous films
K Zdunek	**469**	Reduction of turbulence in an impulse-plasma accelerator operating in a quasi-stationary mode
K Bewilogua and D Wagner	**473**	The effect of secondary electrons in the ion plating deposition of amorphous hydrogenated carbon (a-C:H) films
Peixuan Wang, Xiaodong Sun, Jianwei Zhang, Guoguang Zhang, Haolin Lu, Qifa Yang and Qiu Xu	**477**	The microstructures and composition profiles of iron implanted with combinations of Ni, Mo and B ions
A Zalar, A Barna, P B Barna, P Panjan and S Hofmann	**485**	Characterization of a new type of Cr/Ni multilayer structure with AES and TEM
P A Chatterton, J A Rees, W L Wu and K Al-Assadi	**489**	A self-compensating Langmuir probe for use in rf (13.56 MHz) plasma systems
K Popova, B Spangenberg and V Orlinov	**495**	Parametric modelling of crystalline quartz RIE in CF_4/O_2 plasma
J C Tang, Y B Xu and T Fujikawa	**499**	Studies of σ shape resonance and intramolecular bond length by the multiple-scattering cluster method

WORKSHOP NOTE

N J Kadhim, M Mehta and D Mukherjee	**503**	The design of a low cost graphite crucible for MBE

BOOK REVIEWS	**505**
CORRIGENDUM	**507**
NEW PATENTS	**509**
SOFTWARE SURVEY SECTION	**i**

numbers 8/9

AUTHORS		ARTICLES
G Mohan Rao and S Mohan	**515**	Influence of oxygen partial pressure on the glow discharge characteristics during dc reactive magnetron sputtering
V M Koleshko, V F Belitsky, N A Dolguij, Yu Ch Dulinets and V G Glebovsky	**519**	Technology and application of thin silicide films in semiconductor devices and integrated microcircuits
B Zeroual and G Carter	**525**	Low energy ion beam annealing of amorphised layers in Si
Liao Changgeng, Zheng Zhihao, Wang Yongqiang and Jiang Bianying	**533**	Depth profiles of boron in IPI amorphous silicon films with (p, α) resonance reaction
A M C Pérez-Martín and J J Jiménez-Rodríguez	**537**	Angular distribution and escape probability of sputtered atoms
V P Bhattacharyya and P D Prabhawalkar	**543**	Effect of nitrogen ion bombardment on copper–gold interface
K Ueda, H Nakayama, M Sekine and H Fujita	**547**	Auger valence electron spectroscopy of a structural phase transformation in metastable alpha-Sn grown on InSb(001)
J W Lee and Y K Lee	**555**	Calculation of capture coefficients for a cylindrical cryopump

CLASSIFIED ABSTRACTS	**561**
BOOK REVIEW	**599**
NEW PATENTS	**601**

numbers 10/11

AUTHORS		ARTICLES
A Cerezo	**605**	*1990 C R Burch Prize—Joint Award:* The position-sensitive atom probe
M B Guseva, V G Babaev, R R Ubaidullaev and S Z An	**613**	The scattering of Ar^+, N^+, N_2^+ ions from a NaCl surface
A Hoffman	**617**	Low energy electron induced surface processes: desorption and bond scission of HCN(a) and CN(a) on Pd(111) as studied by thermal desorption spectroscopy
Y Suetsugu and M Nakagawa	**625**	Design study of new distributed ion pumps for the TRISTAN accumulation ring
Z Wronski	**635**	Computer simulation of energy-angle distributions of ions generated in the cathode fall of a glow discharge
S Ghosh, A Sarkar, S Chaudhuri and A K Pal	**645**	Optical properties of ZnO : Al films prepared by reactive dc magnetron sputtering
A de Rudnay	**649**	Web metallizing with dense, directional and energetic Al-vapour jets—a challenge to conventional evaporators
O Mahammad Hussain and P Jayarama Reddy	**657**	Characterization of thin film *n*-CdS/*p*-CdTe heterojunctions
K R Gunasekhar and S Mohan	**661**	Discharge studies in a triode ion plating system
CLASSIFIED ABSTRACTS	**665**	
VACUUM NEWS	**697**	
BOOK REVIEW	**713**	
NEW PATENTS	**715**

AUTHORS		ARTICLES
INVITED REVIEW		
R J Wilson and B L Weiss	**719**	A review of the properties of aluminium alloy films used during silicon device fabrication
REGULAR PAPERS		
M V Kuznetsov, N V Gavrilov and V A Gubanov	**731**	Formation of a TiN_x protective layer by nitrogen ion implantation into titanium
L Michalak and B Adamczyk	**735**	Light simulation of molecular beam epitaxy
K Kobayashi, N Mutsukura and Y Machi	**741**	Electrical measurements in a 13.56 MHz radio-frequency discharge
M Maier, P Hiesinger, K Köhler and W Jantz	**745**	Influence of Si segregation on the two-dimensional electron gas mobility of inverted HEMT structures
K-H Steinheimer and F Werlich	**749**	Behaviour of turbomolecular pumps at high pressures
M Andritschky	**753**	Origin of gas impurities in sputtering plasmas during thin film deposition
A A Hussain	**757**	Observation of SWR in nickel films after exposure of the substrate to an external mechanical force

Y Suetsugu and M Nakagawa	**761**	An improved empirical formula for pumping speeds of ion pumps in the high magnetic field mode
G F Matthews	**769**	Ion diagnostics for the tokamak boundary
J Li and J Beynon	**775**	New interpretation of the *I–V* characteristics of electroformed thin film sandwich structures
BOOK REVIEWS	**779**	
SOFTWARE SURVEY SECTION	**i**	

number 13

ANALYSIS BY A COMBINATION OF ION-BEAM (ACCELERATOR-BASED) AND SURFACE-SPECIFIC TECHNIQUES
Papers from the IB-SA90 Conference
5–7 September 1990, Namur, Belgium

AUTHORS		ARTICLES
J P Coad	**783**	Introduction
R G Dworschak, T Laursen and J L Whitton	**785**	Oxygen depth profiling in thin films using the $^{16}O(^{3}He, \alpha)^{15}O$ nuclear reaction
W Vanderpoorten, P De Moor, P Schuurmans, R Siebelink, G Vancraeyest, J Vanhaverbeke, L Vermeeren, L Vanneste, J Wouters, N Severijns, J Vervier, G Goldring and R Silverans	**789**	In-beam nuclear polarization by ion beam–surface interaction
A Climent-Font, U Wätjen, H Bax and L Palmetshofer	**795**	Characterization of high-dose implants of Co and Cr in Si by RBS
F Sommer, P Chevallier, H Tapiero, P Massiot, P Galle, L Silvestro, P Arizti and D Piccot	**801**	Comparison of PIXE and SXRF analysis for kinetic studies in cell pharmacology of platinum and gold compounds
S Reinke, D Rahmann and R Hippler	**807**	Light emission from sputtered atoms following ion bombardment of polycrystalline Al and Cu targets
Y De Puydt, D Leonard, P Bertrand, Y Novis, M Chtaïb and P Lutgen	**811**	Multitechnique approach of the surface analysis of fluorinated polyethylene terephthalate
P Courel, P Trocellier, M Mosbah, N Toulhoat, J Gosset, P Massiot and D Piccot	**819**	Combined use of electron microprobe analysis and nuclear microanalysis for Mg, Al and Si determination in minerals and glasses
P Courel, N Toulhoat and M Cuney	**821**	Lithium distribution in minerals by nuclear microanalysis
J Paridaens, D Segers, M Dorikens and L Dorikens-Vanpraet	**823**	Surface analysis with slow positrons
S Deckers, F H P M Habraken and J W Geus	**827**	Oxidation of clean and Pt covered Ni(111)
D Decroupet, S Mathot, G Demortier and G Blaise	**831**	SIMS and NRA studies of surface contaminants in gold-rich alloys

REGULAR PAPERS

U S Tandon and B D Pant	**837**	The characteristics of reactive ion etching of polysilicon using SF_6/O_2 and their interdependence
Sun Da-Ming	**845**	The effect of ion exchange on adsorption properties of a 13X molecular sieve

J L Sullivan, S O Saied and N S Xu	**849**	Fast atom and ion surface studies leading to the development of a time of flight fast atom scattering spectrometer
BOOK REVIEW	**863**	
NEW PATENTS	**865**	
SOFTWARE SURVEY SECTION	**i**	

number 14

AUTHORS		ARTICLES
V K Ferleger and V I Matveev	**871**	Auger-electron spectra formation under solid surface bombardment by diatomic molecular beams
M K Bobrova, K Ofeisa, L B Shelyakin and V E Yurasova	**877**	Distributions of embedded gas and of alloy components in the deformation zone of metals
S N Al-Refaie	**883**	Characteristics of thin InP-oxide films
U Ackelid, J Fogelberg and L-G Petersson	**889**	Local gas sampling and surface hydrogen detection in catalysis on planar surfaces
Suk-Ho Choi and Derec Son	**897**	Ball material dependence of spinning rotor gage residual drag
Xu Tingwei and Wu Wenfeng	**901**	Prediction of pressures in the storage ring of the Beijing Electron Positron Collider (BEPC) with the help of Monte Carlo simulation
G Wöhl, A Weisheit, I Flohr and M Böttcher	**905**	Trench etching using a $CBrF_3$ plasma and its study by optical emission spectroscopy
H T El-Shair, A M Ibrahim, E Abd El-Wahabb, M A Afify and F Abd El-Salam	**911**	Optical properties of Sb_2Se_3 thin films
K K Chattopadhyay, I Sanyal, S Chaudhuri and A K Pal	**915**	Burstein–Moss shift in $CuInSe_2$ films
Yan Dawei and Lang Baojun	**919**	The study of rf plasma activated processes for stannic oxide thin film deposition
T S Sheshadri	**923**	Electromagnetic force density distribution in MPD thrusters
P Y Jouan and G Lempérière	**927**	Ion energy distribution at a negatively biased electrode in a sputtering discharge
A A Hussain	**933**	On the broadening of the linewidth in the spin-wave spectra of single crystal nickel films
VACUUM NEWS	**939**	
VACUUM DIARY	**957**
